

PLANNING STATION

Manage every navigation task from one dashboard

Voyager PLANNING STATION offers new levels of automation and simplicity on the bridge to keep your seafarers happy, save you time and improve vessels safety and compliance.

Integrated port to port function automatically generates routes which can then be refined to meet specific orders and other voyage requirements.

Display navigational layers on ENC's to make better routing decisions

Tailor your view by switching layers on or off to refine

route decisions. Access the AIO, ADP, AENP, Navarea Warnings, MARPOL areas, port data and maritime security from a single screen.

Automatically identify exactly the navigational products for safe and compliant navigation

View Voyager's product recommendations on the map or in a list, add or remove items and order those required to make navigational compliance simpler and easier.

Transfer ENC's to ECDIS more safely and easily

ENCs, AIO, ENC updates and permits from the back of bridge computer to the ECDIS while, at the same time, helping to protect against the transfer of malware.

Always have the latest chart and publication information onboard

ENC, publication updates and NtMs are automatically downloaded every week to prevent compliance issues, meaning vessels are less likely to get navigation-related observations or be detained.

Optimise routes with integrated weather routing

VPS works with the world's leading weather routing software partners to optimise routes. Choose from Meteogroup, StormGeo or WNI.

Which Voyager PLANNING STATION package is right for you?

Voyager PLANNING STATION provides an easy and cost-effective solution for the complex and time-consuming task of managing electronic and traditional navigation onboard.

Choose from 4 package options to meet your navigation needs or buy individual modules to meet your specific fleet requirements.
