Planning Station. Manage every navigation task from one dashboard.

Voyager Planning Station offers new levels of automation and simplicity on the bridge to keep your seafarers happy, save you time and improve vessels safety and compliance.

Integrated port to port function automatically
Generates routes which can then be refined to meet specific orders and other voyage requirements.

Display navigational layers on ENCs to make better routeing decisions
Tailor your view by switching layers on or off to refine route decisions. Access the AIO, ADP, AENP, Navarea Warnings, MARPOL areas, port data and maritime security information from a single screen.

Automatically identify the exact navigational products for safe and compliant navigation
View Voyager's product recommendations on the map or in a list, add or remove items and order those required to make navigational compliance simpler and easier.

Transfer ENCs to ECDIS more safely and easily ENCs, AIO, ENC updates and permits from the back of bridge computer to the ECDIS while, at the same time, helping to protect against the transfer of malware.

Always have the latest chart and publication information onboard
ENC, publication updates and NtMs are automatically downloaded weekly to prevent compliance issues, meaning vessels are less likely to get navigation-related observations or be detained.
