Track every fleet from one location

Get a clear view of what's happening in today's complex maritime environment. Find and fix problems faster and improve the effectiveness of your ship management operation.

Manage navigation compliance more effectively

Avoid Port State Control (PSC) and vetting issues with an up to date view of vessel inventories and compliance requirements. Use PSC Inspection data to track compliance performance and prepare for port arrival.

Work more efficiently

View live vessel positions on CMAP charts, overlay weather, MARPOL zones and other nearby vessels. Enhance your experience further with AVCS Online and Risk Intelligence.

Resolve disputes and understand incidents quickly

View current and historical voyage tracking, nautical miles sailed and sea hours, overlaid on charts, MARPOL and other key maritime data.

Spend less on navigation

Spot overspending and drive down your overall cost of navigation with a completely transparent view of your navigational purchasing online.

Which package is right for you?

Voyager Fleet Insight provides a full overview of fleet position, navigation compliance as well as purchasing, digital product usage and service management to help make ship management, navigation and compliance management and purchasing related tasks simpler, more efficient and more cost-effective.

Explore the possibilities with our Voyager Fleet Insight packages.
