What could you save?

Voyager PAYS gives you open access to near worldwide ENC coverage and allows you to open, view and plan routes without incurring any ENC costs. You only ever pay for an ENC if you actually sail through it.

Always on, no admin

With Voyager PAYS, there are no phone calls to make, no emails to send and no orders to approve. Just always on access to worldwide ENC's for safe planning and passage. 24/7.

Prevent over ordering

With Voyager PAYS, vessels can open, view and plan routes using as many ENC's as they like without incurring any additional charges. You only ever pay for an ENC if a vessel sails through it, so there's no risk of vessel's over-ordering ENC's they don't need. And you won't have to review every ENC order for unnecessary expenditure either.

Fix your ENC costs

Voyager PAYS is the only service that gives you the option to fix your ENC costs. We will calculate an incredibly accurate annual price tailored to the vessels in your fleet to give you complete budget certainty. Alternatively, you

can opt to receive a monthly invoice based on actual ENC usage. It's entirely your choice.

Track your vessels. 24/7.

Get a clear view of your ENC spending in one easy-to-see place. With Voyager PAYS, you can view each vessel's location and monitor progress online. You can even view each vessel's actual ENC usage in real time with a full list of charts and invoice value - on your PC, laptop, tablet, or phone.

No hardware. Get started straightaway.

Voyager PAYS uses your SatC terminal to track and report vessel's ENC usage. So, it's incredibly simple and cost effective to get started. That also means it works with every ECDIS.

Minimise data download costs

With Voyager PAYS, having worldwide ENCs on board doesn't have to mean downloading worldwide updates every week. Voyager PAYS comes complete with our Voyager software so it's easy to identify the updates needed to stay compliant. That keeps update file sizes small and updating costs low.
