High profile cases in the press and emerging charterer requirements are creating new pressures to monitor vessels positions more closely and make or approve navigation decisions from shore.

AVCS Online has been developed to enable Managers and Marine Superintendents to deal with these sorts of challenges. It provides online access to the up to date and compliant chart information that is needed to make precise navigation decisions more confidently.

Supporting vessels

Insuring the right navigation decisions such as choosing the best route, re-routing or whether a port can accommodate a vessel.

Monitoring vessels

With the full navigation context for example to ensure compliance with charterer orders or for more general safety when transiting through bad weather.

Verify and/or approve routes

Before vessels sail.

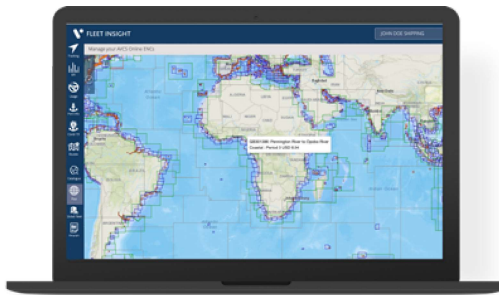

Quickly access chart information

Such as obstructions and depths, etc during an incident such as a grounding.

Whether it be checking passage plans, providing navigational advice, monitoring vessels' progress or dealing with incidents from shore, AVCS Online puts all the information you need at your fingertips.

Global, official and compliant

Online access to the entire AVCS catalogue of more than 16,000 charts + AIO let's you view exactly the same official and compliant chart and T&P information that is displayed on vessels reducing the risk of any confusion or misinformation being relayed in ship/office discussions and helping your operations run more smoothly.

Always on access to latest information

All updates are incorporated into the charts as soon as they are released. There's nothing to do in the office to maintain or update the charts - they are always up to date so you are always using the very latest information.

A better view of what is happening

See latest vessel positions overlaid on actual ENC's together with weather information, piracy information, MARPOL, etc. all in one place to make it easier to manage risk and help reduce the likelihood of issues occurring.

Check and validate routes from shore

View planned routes overlaid on ENC's allows routes to be checked and approved from shore if required.

Access to charts within a few minutes.

With AVCS Online, there are no permits required. Simply click to buy the coverage you need and it appears on screen in a few minutes to enable you to respond quickly to ever changing situations. And the ability to buy ENC's in 3, 6, 9 or 12 months increments only when and if needed also helps to minimise costs.

Tailor view of ENC's to suit requirements

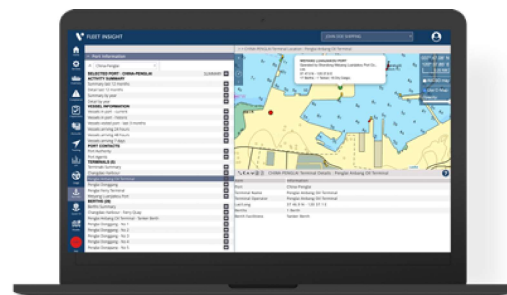

Voyager Fleet Insight's AVCS Online module enables you to switch layers on and off and also set safety margins for contours and depths - just like ECDIS. View the chart information in an uncluttered way to get a broader view and switch on detail when you need it.

Effortless, simple and reliable

Say goodbye to keeping paper charts ashore and the hassle of getting permits to load into navigation software in the office. With AVCS Online, all the ENC's you need are just a few clicks away. And with no backup processes to manage and no software or permits to install you can be confident of having the information you need whenever you need it.

Enhance your understanding

Add additional modules like Port Information and Risk Intelligence to build a more comprehensive view of what is happening manage voyage and fleet activities more efficiently, safely and effectively.

Get started with a no obligation free trial

We are delighted to be able to offer a free, no obligation trial to AVCS Online. To arrange a free 1-month trial, contact your Voyager Worldwide account manager or email us at customerservices@voyagerww.com.
