VOYAGER

Voyager Basic provides a comprehensive, simple to use system for managing navigation supplies and compliance.

Route based ordering reduces navigation spend
Provides route based ordering and automatic identification of the navigational products vessels need to sail routes safely and compliantly to make navigation purchasing more accurate and cost-effective.

Online approval puts office in control
View the route and order basket on the map to easily spot unnecessary items. Choose your own order settings so that smaller purchases are automatically supplied whilst always approving higher value orders.

Automation makes digital navigation more efficient
Approved digital orders are automatically processed and delivered onboard within 10 minutes to give vessels faster access to information they need.

Vessel monitoring
Keep track of your fleet with complimentary hourly position updates displayed on a marine map.

Simpler Technical Publication compliance
See exactly which publications are mandated for each vessel in your fleet by Flag and Class to make it easier to stay compliant and *coming soon* the option to get email alerts about essential New Editions for your fleet.

Self-service account information
Easier tracking of what vessels are spending with online access to orders, invoices, credit notes and billing summaries, without the need to call or email for information.

Always on access
View your account, approve orders and keep track of your vessels from anywhere on any device. No need to be in the office.

One complete system across ship and shore
Manage everything in one place and avoid having to switch between systems for paper charts, books, ENCs and digital publications to make life easier and more efficient.

A system that grows with you
A free entry level system to meet your needs today and the option to upgrade if your needs change, without having to switch suppliers.

Basic
$0/Month
